

Electives.... What should I take?

Students working on a Bachelor's of Business Administration (B.B.A.) degree at GSU have a number of electives to take. There are two types of electives in the Junior/Senior years: RCB (Robinson College of Business) and Non-Robinson College of Business electives. It is common for students to have questions about which courses they should or can select for these requirements. Below you will find examples of departments and specific courses to use as a starting point for ideas. As always, please consult your catalog for specifics on how many electives you need and the prerequisites of your choices. **If you have questions, please contact your adviser.**

Robinson College of Business electives

Definition: a 3000/4000-level course within the Robinson College of Business that is **outside of your major** and is not cross-listed with a course in your major.

Course types from which you can choose:

--	--

Students can focus on a given area for their business electives (example: a CIS major who wants to focus on management might choose all management electives) or choose from different departments for a broader range of knowledge. Remember – the choice of electives is yours. Please feel free to discuss options with your adviser. Please consult the most recent catalog for course offerings and be sure to **always check prerequisites!**

Note that prerequisites are found in the catalog rather than the schedule of classes. Always refer to the most recent catalog edition for correct prerequisites.

See other side for information on Non-RCB Electives.
